Secret Success Mantra for New Crypto Currency/Token

Why new Crypto Currency/Token fails?

Before we discuss steps for creating successful Crypto investment for investors, let us understand 4 main reasons for failure of new Crypto Currency/Token:

✓ *Reason 1: Simply TOO many Crypto Currencies/Tokens.*

- CoinMarketCap and other sources shows only top Crypto Currencies/Tokens.
- Do you know, every single day around 6347 new Crypto Currencies/Tokens are created with belief of competing with BTC/Ethereum someday or earning quick money by adding people on Telegram and other marketing mediums. Almost all of them are successful.
- There are too many to choose from with very meagre differences.
- What you find magnanimous in your newly introduced Crypto Currency/Token may not be able to create needed impact in investors mind.
- Investor still like to see how much profit he will get.

✓ *Reason 2: Usually new crypto currency is started with myopic motto like “I win, you lose” / “I win alone”.*

- If motto is making your Crypto Currency/Token successful, you will fail. Motto should be macro where focus should be to grow Crypto Currency market for all the Crypto Currencies including your new launched Crypto Currency.
- Motto should be “We all grow TOGETHER”

✓ **Reason 3: Believing that only marketing or great idea means success of currencies.**

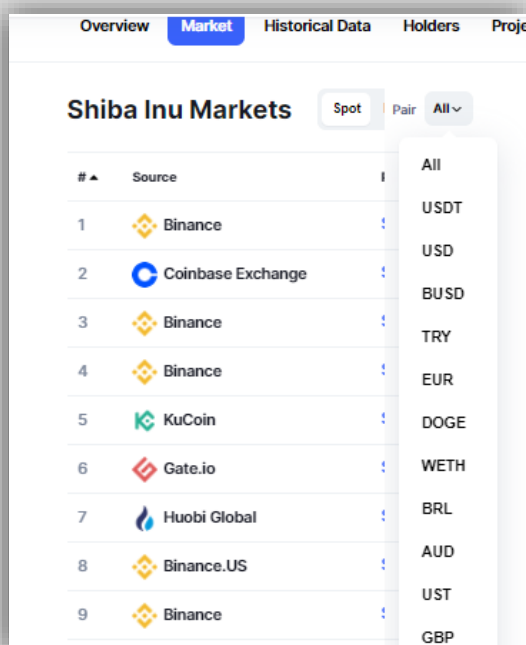

- Person investing in Crypto Currency is not investing on your dream. He is investing to get 100x return as well. If you have great idea which will change world in next 100 Years, investor may like your idea but he don't want to invest in it. He don't want to wait 100 years. He needs ROI (Return On Investment).
- Idea of having members on Telegram, Facebook, Twitter, etc. means successful is Myth. More members does not result into more real trade. Marketing is important element to success of new crypto currency but it is just one of the "Piece" to big puzzle. Remember "Only Marketing does not result into Successful Currencies"

• **Reason 4: Not believing in your own currency.**

- If you believe in your currency, do initial investment, create initial flow for month with different alt currencies.
- Any investor will like to invest in currency where there is real investment from Owner of the currency, Currency is being traded in multiple "Pairs" and not only with one currency like BTC/ETH, other investors are investing real money in this currency. If you as an owner do not invest real money in your new currency, no one will. You will be able to fool some user to buy some of your currency but surely this is recipe to failure.
- Remember, if you are not able to build network with other currencies and create "Pairs" and if you are not able to generate initial transactions with your money, no investor will invest.

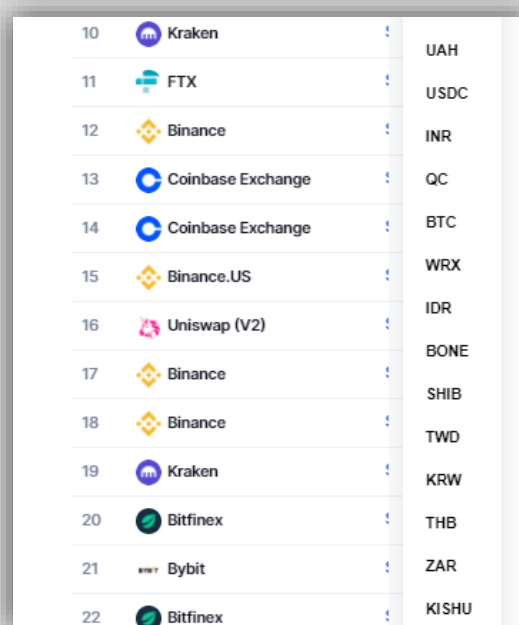

Success Mantra for Newly launched Crypto Currency/Token

- Build profitable and sustainable environment
 - Understand, there are around 6347 new currencies created everyday with belief of competing with BTC/Ethereum someday or earning quick money by adding people on Telegram and other marketing/social mediums. None of them are successful.
 - With Millions of currencies around, you cannot win alone. Currency need to have network for currencies who creates an environment for investor to believe in and invest also possibility of arbitrage.
 - Create Pairs with various other currencies, create network with aim to grow together.
- Build pairs / Build Community
 - Example: Shiba Inu Token is paired with many other currencies and also traded in many exchanges. All the successful currencies are always paired with multiple currencies which installs trust and confidence in investor and also give them opportunity to earn via arbitrage.

The screenshot shows the 'Shiba Inu Markets' page with tabs for Overview, Market, Historical Data, Holders, and Projects. The 'Market' tab is active, displaying a table of trading pairs. A dropdown menu is open, showing various fiat and crypto currencies available for trading.

#	Source	Pair
1	Binance	USDT
